Curran's Atlas Of Histopathology - With 810 Photomicrographs

Synopsis

This is the fourth edition of Professor Curran's well-known and widely used colour atlas of histopathology. The text has been completely revised and there have been additional immunohistological images added to the 804 full colour illustrations that make the atlas such a valuable reference text for students and pathologists alike. The clarity of the text and the colour balance of the sharply-focused illustrations are unique. The contents of each illustration were carefully chosen and balanced for the structural importance. The boundaries of the pictures are defined with precision, to make sure that very little space is wasted in the tissues. The general arrangement of the contents has been retained, with a chapter on each of the main systems or organs of the body. There is an introductory chapter of a general nature which demonstrates the more important reactions of the tissues in disease and at the same time teaches the student the basic language of histopathology, thereby enabling him or her to read and assess the significance of changes in the tissue as revealed by microscopy. Most of the conditions are common or fairly common diseases, but occasional rare lesions are included. This book is primarily an atlas, the primary purpose of which is to convey information in visual form. It is meant to complement existing textbooks. A new comprehensive index has been prepared for this edition. The book is intended primarily for undergraduate students but experience with its predecessors suggests that it is likely to prove useful to postgraduate students in training in pathology or other clinical disciplines.

Book Information

Paperback: 288 pages

Publisher: Harvey Miller Publishers; 4th edition (April 15, 1999)

Language: English

ISBN-10: 0192632205

ISBN-13: 978-0192632203

Product Dimensions: 8.3 x 1 x 10.7 inches

Shipping Weight: 2.5 pounds

Average Customer Review: 4.4 out of 5 stars [See all reviews](#) (7 customer reviews)

Best Sellers Rank: #1,552,309 in Books (See Top 100 in Books) #185 in [Books > Medical Books > Basic Sciences > Histology](#) #233 in [Books > Textbooks > Medicine & Health Sciences > Reference > Atlases](#) #327 in [Books > Medical Books > Medicine > Reference > Medical Atlases](#)

Customer Reviews

I found this book to be a great review source for slide review for lab exams. Each slide shows a very

typical example of a pathological condition and comes with an explanation of the key features. It is a great way to focus your studies for exams or prepare for slide presentations if your class requires them.

Great atlas without it we would not pass our 3rd year medical college and with high degree. I Love it and it really make the examination easier. Thank you.

Nice pictures and good explanation, but it will be better if it have pictures of different magnification. Still it's a big help

Love it, during my residency it gets me on track to know where the problem may be found in the slides.
